

Lloyds Smmart Proofer

Model- SF92NM1

Economical Smmart Replacement of traditional Ink Proofing Kit

The Lloyds low cost Ink Proofer SF92NM1 for quick, repeatable and high accuracy proofing and colour-matching of all types of litho, web-offset, letterpress inks and varnishes.

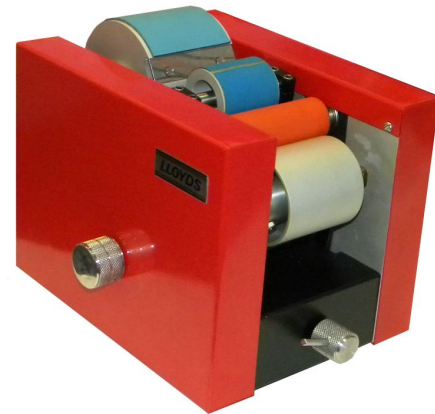

Smmart proofers saves time & cost as testing on printing press is no longer needed.

This versatile equipment print strips of 50 mm x 150 mm with a known ink layer thickness which can be used for multiple application.

The Smmart proofers can print on all sorts of coated and un-coated paper, board, plastic films and laminates etc (flexible substrates only).

Application

- Colour Measurement
- Colour matching systems
- Visual appraisal
- Density measurement
- Rub & Abrasion Resistance
- Determination of coverage
- Scratch resistance
- Set-off measurement
- Ink transfer in g/m²
- Print Quality
- Flexibility
- Adhesion & Gloss measurement
- Light Fastness
- Chemical resistance

Features

- Accurate Proofs with Excellent reproducibility in single operation
- Eliminates human error as in conventional inks proofing kit
- Supplied with fixed measuring bar for variable film thickness (1.5 g/m² and 2.5 g/m²)
- Modern and Sturdy design
- Prints on various flexible surfaces up to 2 mm thick
- Designed for intensive use over a long period

Specification

- ◆ Printing Width 50 mm
- ◆ Printing length 150 mm
- ◆ Printing Force **FIX 600 N**
- ◆ Printing Roller Options standard conventional, UV (optional)/ Combi (optional, std and UV both)
